# Build Your Skill

Your expertise, turned into a recipe AI can follow.

**YOUR SKILL NAME**

## 1 TASK + WHEN TO USE

What should AI do? When should it use this skill?

Example: Draft a welcome email after start details are confirmed.

## 2 REQUIRED INPUTS

What facts, templates, or links does AI need?

Example: Confirmed start details, approved template, resource links.

## 3 ORDERED STEPS

What should AI do first, next, and last?

Example: Check inputs, draft the email, refine, then flag gaps.

## 4 RULES + MISSING INFO

What rules apply? What if details are missing or conflict?

Example: Be warm and concise. Ask for missing facts; never guess.

## 5 OUTPUT + QUALITY

What should AI return? What makes the result useful?

Example: Subject line, draft, and gaps; include confirmed details.

## 6 TEST + HUMAN REVIEW

How will you test it? Who checks and approves?

Example: Try missing or conflicting details. HR reviews the draft.

**A clear recipe. A consistent starting point.**

Use your workflow micro steps. Test with approved or fictional information. Have a person check the result.
