

Find the Work

Think about last week. Which repeatable tasks took more time than they should?

REPEATS

Does it happen often?

FOLLOWS A PATTERN

Similar steps each time?

EASY TO CHECK

Can you spot a mistake?

TAKES TIME

Would help save time?

List 3-5 tasks. Score each factor: 1 = low, 5 = high. Then choose Human, AI, or Both.

TASK / RECURRING ACTIVITY	REPEATS	PATTERN	CHECKABLE	TIME	HUMAN / AI

Start with an opportunity, not a technology.

Higher scores suggest a stronger starting point, not permission to automate. Consider risk and human review.

Choose Your Starting Point

Pick one manageable task. You are exploring AI support, not handing over responsibility.

THE TASK OR STEP I WANT TO IMPROVE

GOOD AI START

Repeatable work, clear rules, and a result you can check.

My notes

HYBRID WORK

AI prepares or organizes. A person adds context and decides.

My notes

KEEP HUMAN-LED

Judgment, relationships, and consequential decisions stay human.

My notes

Today, this work looks like:

I would like it to be:

A person must still:

One small starting point is enough.

If the full process feels too big, choose one repeatable step within it.

Build the Workflow

Name the main tasks, add the smaller actions, and decide where a person or AI helps.

TRIGGER

What starts the work?

GOAL

What does done look like?

Macro step = a main task. Micro steps = the smaller actions. Mark each action H (Human), A (AI), or H+A.

PREPARATION

Gather what you need.

MACRO STEP 1

MICRO STEPS

H / A	Action

MACRO STEP 2

MICRO STEPS

H / A	Action

CREATION

Make the first version.

MACRO STEP 1

MICRO STEPS

H / A	Action

MACRO STEP 2

MICRO STEPS

H / A	Action

REFINEMENT

Make it better.

MACRO STEP 1

MICRO STEPS

H / A	Action

MACRO STEP 2

MICRO STEPS

H / A	Action

REVIEW

Check before acting.

MACRO STEP 1

MICRO STEPS

H / A	Action

MACRO STEP 2

MICRO STEPS

H / A	Action

HUMAN CHECKPOINT

What must a person check or approve before the work moves forward?

See It in Plain Language

Example only: use this as a guide, then make the workflow your own.

EXAMPLE: WEEKLY TEAM UPDATE

Trigger: Friday at 2:00 PM

Goal: A reviewed one-page update sent to leadership.

PREPARATION

MACRO STEP

Collect inputs

MICRO STEPS

H: Confirm approved sources and key metrics.

A: Organize notes and information.

CREATION

MACRO STEP

Draft the update

MICRO STEPS

A: Use the usual structure and format.

A: Flag missing information instead of guessing.

REFINEMENT

MACRO STEP

Improve the draft

MICRO STEPS

A: Shorten wording and improve readability.

H: Add context and highlight decisions.

REVIEW

MACRO STEP

Validate and approve

MICRO STEPS

H: Verify metrics and decide what matters.

H: Approve and send the final update.

AI supports the repeatable pieces. People stay accountable.

Keep context, judgment, accuracy, approval, and final action with a person.
